

# Oslo Wastewater Treatment Plant Uses Folding Container for Two-Way Charging

## Overview

---

What is the largest sewage treatment plant in Norway?

Veas is Norway's largest wastewater treatment plant and treats sewage water originating from Oslo, and nearby municipals, corresponding to 867,000 person equivalents.

Will PNC Norge expand the sewage treatment plant in Oslo?

In May 2017, PNC Norge was awarded the contract to expand the sewage treatment plant in the Norwegian capital of Oslo. The plant's increased capacity will allow it to treat the wastewater produced by 500,000 residents, instead of the current 270,000.

How many waste treatment plants are there in Norway?

There are also about 350,000 treatment plants for approximately 800,000 people who either live in sparsely populated areas or have cabins. For these too, the municipality is the pollution control authority. Most wastewater treatment plants in Norway were built during the period 1970 to 1985.

What is Oslo's new water supply project?

Oslo currently relies on a single main water source, leaving the city's supply vulnerable to disruptions. The New Water Supply project aims to bolster resilience by creating an alternative water supply sourced from Holsfjorden in Lier Municipality. The project also includes a robust water treatment plant and a new main pipeline network for Oslo.
