# Outdoor Communication Power Supply BESS Financing

## Overview

---

Is Bess financing based on a corporate balance sheet?

A few years ago, BESS financing was mostly reliant on corporate balance sheets or subsidies. Today, we are seeing non-recourse project finance for 600+ MW portfolios, mezzanine debt entering the capital stack, and public banks co-financing with private lenders.

How are Bess projects financed?

Today, we are seeing non-recourse project finance for 600+ MW portfolios, mezzanine debt entering the capital stack, and public banks co-financing with private lenders. For developers, asset managers, and financiers alike, this is a call to sophisticate how BESS projects are packaged and financed.

What is Bess & how does it work?

Enabling financing through blended revenue strategies Unlike renewables, where a single PPA can unlock up to 80% leverage, BESS presents a fragmented income profile with high market exposure based on wholesale arbitrage on day-ahead and intraday markets, balancing services, frequency response, and capacity payments.

What is a Bess system control service?

Together these services provide system control services to maintain the grid within 50 Hz +/- 1%, and some (particularly DC) are well suited to BESS given its ability to respond very quickly (sub 1 second) to ensure small deviations from the target frequency do not develop into larger issues.

## Outdoor Communication Power Supply BESS Financing
