

# Outdoor base station integration

## Overview

---

What is Itri O-ran micro outdoor base station?

ITRI demonstrates its latest O-RAN micro outdoor base station solutions with MediaTek, LITEON Technology, Alpha Networks, and Wiwynn Corp. This versatile connectivity technology, covering sub-6 GHz, millimeter waves, and Low-Earth-Orbit (LEO) satellites, has enabled several enterprises to advance their products into global markets.

How to deploy a base station in a complex network environment?

Previous research has extensively explored strategies for base station deployment using intelligent optimization algorithms. These studies employed advanced algorithms such as the sparrow algorithm, artificial immune system algorithm, and genetic algorithm, aiming to find optimal base station layouts in complex network environments.

How does a base station deployment method optimize the base station layout?

The base station deployment method proposed in this study dynamically optimizes the base station layout based on annual environmental change characteristics.

Why are base stations important?

As critical nodes in wireless network connectivity, base stations, if not deployed with foresight and scientific planning, may not only lead to resource wastage, but also cause signal interference, directly affecting network coverage, signal quality, and user experience, thereby increasing the complexity of network management and operational costs.

## Outdoor base station integration
