

# Palestine base station power box and price

## Overview

---

Where does Palestine get its electricity from?

Palestine gets 87% of its electricity needs from Israel, and the rest from Jordan and Egypt, supported by local power generation through solar photovoltaic plants (which contribute to 5% of total consumption), and the Gaza Power Plant (which contributes about 140 MW).

How much energy does Palestine use?

The energy distributed through these stations constitutes 1.55 GWh, i.e. 22% of total consumption in the West Bank. The electricity sector in Palestine differs from other countries in the region in several aspects:.

How much does it cost to build a power plant in Palestine?

The Palestine Power Generation Company continues to plan for the establishment of a combined-cycle power plant with a total capacity of up to 450MW each on a Build Own and Operate (BOO) basis. Implementation of the 250MW first phase will involve a pilot project at a total cost of \$344 million in the North of the West Bank.

How did Palestinians respond to energy dependence?

Fostering Palestinian energy dependence enabled Israeli authorities to deny energy access as a core counterinsurgency tactic. Palestinians responded to energy poverty and dependence in a variety of ways. Some secured their own energy supply at a very local level. Palestinians in Gaza, for instance, adopted solar power in the 1970s.
