

Palestine power generation container house

Overview

How much does it cost to build a power plant in Palestine?

The Palestine Power Generation Company continues to plan for the establishment of a combined-cycle power plant with a total capacity of up to 450MW each on a Build Own and Operate (BOO) basis. Implementation of the 250MW first phase will involve a pilot project at a total cost of \$344 million in the North of the West Bank.

Could gas power plants be built in the West Bank?

Another opportunity exists for establishing one or two gas-fired power plants in the West Bank, converting the diesel-based Gaza Power Plant to operate on gas, and replacing transformers in Gaza.

How much electricity does GPGC use in Gaza?

The full capacity of GPGC is 140MW but often operates on 80MW. The total demand for electricity in Gaza is roughly 500MW. Egyptian power lines have been inoperational for several years.

How much electricity does Gaza need?

The total demand for electricity in Gaza is roughly 500MW. Egyptian power lines have been inoperational for several years. As a result, daily electricity cuts affect water, sanitation, education, agriculture, telecommunications as well as healthcare services.
