Portable Power Bank for Mobile Workstations

Overview

What is the best portable power station for a laptop?

The SOLIX C300 portable power station by Anker is an excellent option for longer stints away from a power outlet. In addition to its many (and versatile) charging outlets, the accessory has a large battery pack that can power up a laptop several times. Anker has equipped the product with high-tech LiFePO4 batteries.

How to choose a laptop power bank?

We suggest looking for a laptop power bank with a 20,000 mAh or larger battery pack. This capacity will ensure that you can fully charge a laptop and have spare power for a phone, a tablet, and other small gadgets such as wireless headphones or earbuds. A battery pack with enough power to charge a laptop is all but guaranteed to generate heat.

How much power does a power bank give a phone?

Our testing shows that a power bank can offer your phone between 70-80% of the power it contains, or more depending on the battery. It loses the rest due to the inefficiency of the power transfer. That means a 5,000 mAh battery can fully charge a phone with a 3,500 mAh battery, like an iPhone 16.

Are mobile powerbanks worth it?

Combined with advancements in lithium-ion battery and USB-C PowerDelivery technology, the weight and capacity of mobile powerbanks capable of charging laptops have improved a lot since their debut, however. In short, if you are on the go and rely on your phone or laptop for much of the day, a good powerbank might be very worthwhile.
