

## **Porto Novo new solar panels**

## Overview

---

Is Portugal making progress in solar photovoltaic energy?

Portugal is making progress in solar photovoltaic energy with major projects such as Sonnedix Douro, with a capacity of 150 MW. The sector emphasizes the importance of investing in the national electricity grid and new storage technologies.

How is solar energy driving the energy transition in Portugal?

Photovoltaic solar energy is driving the energy transition in Portugal with large-scale plants and new grid challenges. Portugal is making progress in solar photovoltaic energy with major projects such as Sonnedix Douro, with a capacity of 150 MW.

What angle should solar panels be installed in Porto?

To maximize your solar PV system's energy output in Porto, Portugal (Lat/Long 41.1691, -8.6793) throughout the year, you should tilt your panels at an angle of 35° South for fixed panel installations.

What is a photovoltaic plant in Portugal?

The photovoltaic plant installed next to an operational wind farm nearly doubles renewable production at that location and accelerates the energy transition in the central region of the country. The project is the second hybrid operation in Portugal.
