

Power distribution uninterruptible power supply source manufacturer

Overview

What is an uninterruptible power source (UPS)?

An uninterruptible power source (UPS) is an electrical equipment that provides emergency power supply to a electric load when the input power source or mains power fails. A UPS differs from an auxiliary or emergency power system or standby generator in that it will provide near-instantaneous protection from input power.

What is an industrial uninterruptible power supply system?

Industrial uninterruptible power supply systems (UPS Systems) include core technologies to cover industrial equipment. Our systems offer applications ranging from a few hundred watts to massive Multi-Mega Watt Parallel UPS installs inclusive of voltage regulations, voltage correction, sag correction, surge suppression and harmonic mitigation.

What are the top 10 uninterruptible power supply manufacturers?

Due to natural causes, the power back-up is also required. Thus, paving the way for UPS market to establish its presence across the globe. World's top 10 uninterruptible power supply manufacturers are Eaton Corporation, Emerson, APC, Toshiba, General Electric, Mitsubishi Electric, Siemens, Kehua, Socomec and Vertiv.

Why is the uninterruptible power supply market growing?

It must be noted that the growth of the uninterruptible power supply manufacturers' market can be attributed to the growing need for zero power downtime. In addition to this, the expanding need for scalable and redundant power systems has helped in achieving huge inflow of capital in the market.
