

Prague household solar energy storage

Overview

What type of electricity storage is used in Czech Republic?

Batteries and thermal energy storage are the two most commonly used methods of electricity storage for households in the Czech Republic. 2. What electricity storage projects are anticipated in your jurisdiction in coming years?

.

Is there a future for energy storage in the Czech Republic?

Despite the ongoing discussions, there is no significant development in the area of energy storage. In 2015, the Czech Government adopted the National Action Plan for Smart Grids ("NAPSG") prepared by the Ministry of Industry and Trade under principles set out in the update of the State Energy Concept, which was also introduced in 2015.

How does the Czech government subsidise photovoltaic panels?

The Czech government subsidises the installation of photovoltaic panels located on domestic properties producing energy for their own consumption and the purchase of co-located energy storage solutions. These subsidies are provided under the "New Green Savings Programme" administered by the State Environmental Fund.

Who owns the energy companies in the Czech Republic?

All of them are owned by CEZ Group, which is the largest energy group in the Czech Republic and controlled by the Czech government. In 2013, CEZ Group was considering constructing a new pumped hydro storage project; however, the project was postponed due to the low profitability of the investment.
