Prague's new solar energy storage

Overview

Why is a photovoltaic system important in Czechia?

“It is very important because many people have made investments to the photovoltaic system,” Preisinger said. Stepan Chalupa, president of the Czech Renewable Energy Chamber, said that Czechia's energy market is continuously improving but better regulations are needed to prohibit fraudulent providers from operating.

How much solar power does the Czech Republic have in 2022?

As the central European nation clocked in 2,627 MW of installed solar PV capacity at the end of 2022 – which is 426 MW up from the previous year, according to estimates published by the International Renewable Energy Agency (IRENA) – the Czech Republic's continued achievement of these solar gains was on the lips of most attendees.

Is the Czech Republic ready for pumped-storage hydroelectric power plants?

Bulk energy storage is currently dominated by hydroelectric dams, both conventional as well as pumped. There are six localities considered for new pumped-storage hydroelectric power plants in the Czech Republic but public acceptance presents a challenge. Front-of-meter installations in the Czech Republic are mired in regulations.

Is the solar industry booming in Czech Republic?

Czech Environment Minister Petr Hladík said that the solar industry is currently experiencing a huge boom. However, he dashed hopes for the country only pursuing PV by stating that its generating capacity would be a mix of renewables and nuclear. There are six commercial reactors generating roughly one-third of the landlocked country's electricity.
