What is a 48 volt Solar System?

The power of a panel, which is measured in watts, equals voltage multiplied by current. Thus, the fact that the voltage of solar panels is 48v allows them to produce more energy than 12v or 24v panels. The most powerful PV modules are rated at 48 volts. However, it doesn't immediately mean that you should always go for a 48 volt solar system.
