

Proportion of new energy storage BESS in Rome

Overview

Why does Italy have more energy storage capacity?

The “Storage systems observatory” report published by Italian electronic industry body Anie states more energy storage capacity arrived from fewer, larger BESS in the country last year, thanks to the dominance of more-than-1 MWh, “utility-scale” facilities.

Are battery energy storage systems needed in Italy?

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of residential scale systems, associated with small scale solar plants, having a capacity of less than 20 kWh.

How many energy storage systems were installed in Italy last year?

The industrial group’s report said 209,112 energy storage systems were installed in Italy last year, with total rated power of 2,113 MW and storage capacity of 5,921 MWh. That took the nation to 733,666 systems, at the end of the year, with 5,565 MW total rated power and 12,942 MWh of storage.

Is Italy's energy storage landscape undergoing a major shift in 2024?

Italy’s energy storage landscape is undergoing a major shift, with utility-scale battery energy storage systems (BESS) experiencing exponential growth in 2024, even as residential and commercial & industrial (C&I) installations decline, according to a new report by industry group Anie.
