

# Recommendation of imported UPS uninterruptible power supply from Rotterdam Netherlands

## Overview

---

What is a ups & how does it work?

UPS stands for Uninterruptible Power Supply. A UPS is a device that immediately takes over the power supply in the event of a power failure and supplies it to the connected systems. UPS stands for 'Uninterruptible Power Supply', translating to 'uninterrupted power supply'. UPS systems are also referred to as no-break or emergency power supplies.

What are uninterruptible power supply standards?

Uninterruptible power supply standards are established technical frameworks that define the minimum acceptable levels of safety, functionality, and efficiency for UPS systems. These standards are not arbitrary they are the result of decades of research, development, and practical field data gathered by industry experts, scientists, and engineers.

What is an uninterrupted power supply system (UPS)?

2.1 An uninterrupted power supply system (UPS) is defined as a device which for a specific period of time supplies continuous power to radio equipment independent of any power failures in the ship's main or emergency source of electric energy.2 rechargeable accumulator batteries, complying with the requirements of annex 1.
