Overview

What is electricity Pakistan?

As a major exhibition focused solely on energy storage and power solutions, Electricity Pakistan is designed to be an influential force in shaping the future of Pakistan's energy and power sectors. The global energy landscape is rapidly evolving, with efficient power storage at its forefront.

How many power plants are in Pakistan?

Pakistan has 62 utility-scale power plants in operation, with a total capacity of 21455.0 MW. This data is a derivative set of data gathered by source mentioned below. Global Energy Observatory/Google/KTH Royal Institute of Technology in Stockholm/Enipedia/World Resources Institute/database.earth.

Why is electricity Pakistan important?

Key sectors such as solar, wind, and hydro are growing, and advances in battery storage, grid optimization, and smart infrastructure are making reliable, clean energy more accessible. Electricity Pakistan is more than just an exhibition - it's a hub for progress, innovation, and collaboration in the power and energy storage sector.

How many NPPs are operating near Karachi nuclear power generation station (knpgs)?

Two NPPs (i.e K-2 & K-3) of total 2,200 MWe capacity are operating near KANUPP. K-2 operates commercially since May, 2021 and K-3 since April, 2022. This new nuclear power generation station of twin units is termed as Karachi Nuclear Power Generation Station (KNPGS). For the year 2024, the performance of units is shown below.
