

Replacing a breaker in China in New-Zealand

Overview

Should I replace or upgrade my main circuit breaker?

Replacing and upgrading your main circuit breaker is a significant step towards enhancing the safety and functionality of your home's electrical system. Recognizing the signs of when to replace your breaker and understanding the process ensures that your electrical setup remains reliable and efficient.

Should you upgrade your electrical system in an old home in New Zealand?

Upgrading the electrical system in an old home in New Zealand is a smart investment that improves safety, compliance, and energy efficiency. Whether it's replacing outdated wiring, upgrading the switchboard, or adding modern appliances, careful planning is key to a successful upgrade.

What should I do if I need a new circuit breaker?

Replacement main circuit breaker - Smart breaker (if upgrading)

1. Safety First: - Turn off all appliances and devices connected to your electrical system.
- Wear insulated gloves and goggles to protect yourself from electrical hazards.
2. Shut Off the Power: - Locate the main circuit breaker panel and shut off the main power supply.

Are old switchboards a hazard in New Zealand?

Older homes in New Zealand often have wiring that no longer meets safety standards or can't handle modern electrical demands. Old switchboards can also be a hazard if not updated to modern, safe, boards with circuit breakers and RCDs. Don't risk a house fire with technology from the early 1900's!
