What are the requirements for dedicated use energy storage system buildings?

For the purpose of Table 1206.14, dedicated use energy storage system buildings shall comply with all the following: The building shall only be used for energy storage systems, electrical energy generation, and other electrical grid related operations. Other occupancy types shall not be permitted in the building.

What are the requirements for chemical storage cabinets?

There are some general requirements for chemical storage cabinets that can assist in the safe storage of chemicals indoors. A chemical storage cabinet for flammable liquids, flammable solids, oxidising agents, organic peroxides and toxic substances must have: Self-closing, close-fitting doors.

How many kWh can you put in a garage?

In all other locations noted above, the size limit is 80 kWh. On the exterior walls of the home, it's important to note that systems cannot go within 3 feet of doors or windows leading directly into the home. And as we will soon discuss, code compliance for ESS in an attached garage can be much more complicated than systems in a detached garage.
