Why is Saudi Arabia launching a battery storage project?

Saudi Arabia aims to generate 50% of its electricity from renewables by 2030. However, renewable energy sources like solar and wind can be unpredictable. The 12.5 GWh battery storage project will solve this issue by storing energy and ensuring a steady power supply. This is very important in Saudi Arabia.

How big is Riyadh solar project?

The project coming up in Riyadh has a 30.8 square km land parcel available to install a total capacity of 1.5GW PV solar modules with associated single axial tracker and inverters. The ambitions of Saudi Arabia's National Renewable Energy Programme are on track.

How a 12.5 GWh battery storage project will help Saudi Arabia?

The 12.5 GWh battery storage project will solve this issue by storing energy and ensuring a steady power supply. This is very important in Saudi Arabia. The nation's energy demand is high because of extreme temperatures and heavy electricity use.

Should Saudi Arabia invest in solar and wind energy?

Currently, Saudi Arabia is investing heavily in solar and wind energy projects. However, to successfully transition to renewables, energy storage systems are crucial. Without large-scale storage, solar and wind power alone would not be enough to ensure a stable energy supply.
