Where is solar energy used in Saudi Arabia?

The current state of distributed PV systems in Saudi Arabia In 2021, homes powered by solar energy constituted approximately 2.02 % of all residential properties in Saudi Arabia. The Riyadh region led with the highest proportion of solar energy adoption at approximately 3.34 %, followed by Makkah at 2.52 % and the Eastern Province at 0.98 %.

Do distributed PV systems work in Saudi Arabia?

This study has provided valuable insights into the utilisation, potential, and challenges of distributed PV systems in Saudi Arabia, offering findings that are applicable to many MENA countries with similar climate conditions. By analysing UF, PR, energy savings, electricity rates, and economic viability, several key conclusions have emerged.

What is the optimal orientation for solar panels in Saudi Arabia?

The focus has been on optimal azimuth and tilt angles in Saudi Arabia and desert regions to determine the optimal orientation for installing PV modules on rooftops and urban areas to optimise PV power generation. PV systems are strategically positioned and angled to maximise their exposure to solar radiation .
