

# Riyadh solar power station generator uses

## Overview

---

Can Saudi Arabia develop a 300 MW solar power facility?

They aim to develop a 300 MW solar power facility, contributing to Saudi Arabia's renewable energy goals. This partnership focuses on developing the Rabigh 2 Solar IPP under Saudi Arabia's Vision 2030, which aims to diversify the Kingdom's energy sector.

What does the Rabigh 2 solar IPP agreement mean for Saudi Arabia?

The Rabigh 2 Solar IPP agreement underscores Saudi Arabia's commitment to expanding its renewable energy portfolio as part of its Vision 2030 goals. With a strong international partnership and an efficient solar tariff, the project will play a key role in the Kingdom's energy transition.

How many kWh will Saudi Arabia produce a year?

The plant is expected to deliver an impressive yield of ~2300 kWh per year over an operational life of 25 years. In support of its Vision 2030 strategy, the Kingdom of Saudi Arabia has set an ambitious target to generate 50% of its electricity from renewable energy sources by 2030.

What is the Rabigh 2 solar Independent Power Project (IPP)?

The Rabigh 2 Photovoltaic (PV) Solar Independent Power Project (IPP) involves the construction and operation of a utility-scale solar power plant with a generation capacity of approximately 300 MW, equivalent to the energy required to power 110,000 homes.
