

Samoa Power Plant Wind Power Base Station Price

Overview

Does American Samoa have a net metering law?

In 2008, American Samoa adopted a net metering law for distributed generation up to 30 kW, allowing owners of small solar or wind facilities to receive credit for excess power sent to the grid.

What can American Samoa do about energy efficiency?

There are many opportunities in American Samoa for the adoption of energy efficiency and renewable energy technologies, including focusing on energy efficiency awareness, conducting energy and water audits, improving aging infrastructure, and developing island building codes and equipment standards.

What has the EPC done for Samoa?

To date, works continue for further developments of its existing generation and distribution network. As mandated to generate, distribute and sell electricity supply to all of Samoa, the EPC has connected up to 99% of Samoa's population. Increased access by all people of Samoa, to quality and affordable electricity supply.
