What is a solar water pump?

A solar Water pump is a normal pump with an electric motor. To generate the electricity needed for the engine on site, a photo voltaic panel converts the sun's energy into a continuous electric current (12 or 24V in general) that can be stored in a solar battery park.

What types of solar water pumps are available?

TATA POWER SOLAR offers both DC and AC range of Solar Water Pumps in both Surface and Submersible categories. These pumps help reduce farmers' dependency on expensive fuels and their maintenance costs as opposed to conventional irrigation systems.
