

Semi-automatic cylindrical power battery pack

Overview

What is cylindrical battery pack semi-automatic assembly line?

This cylindrical battery pack semi-automatic assembly line is specially designed for 32140 33140 etc cylindrical battery pack production. This prismatic battery pack assembly line is used to convert square cells into fully functional battery packs or batteries to meet the power needs of various applications.

What is a cylindrical battery pack?

Cylindrical battery packs are widely used in various applications due to their high energy density, low self-discharge rate and long cycle life.

What is a prismatic battery pack assembly line?

This prismatic battery pack assembly line is used to convert square cells into fully functional battery packs or batteries to meet the power needs of various applications. Automated and semi-automated assembly lines can greatly improve productivity, ensure product quality, and can be customized to meet the needs of different customers.

What kind of equipment is used in battery manufacturing?

Our business covers cylindrical, prismatic, pouch battery pack semi-automatic&full automatic assembly machines, battery cell&pack testing systems, lab-scale fabrication machines for coin cell, cylindrical cell&pouch cell, battery environmental safety testing equipment and super capacitor production equipment, etc.
