

# **Single largest energy storage power station**

## Overview

---

Which energy storage power station successfully transmitted power?

China's largest single station-type electrochemical energy storage power station Ningde Xiapu energy storage power station (Phase I) successfully transmitted power. On November 16, Fujian GW-level Ningde Xiapu Energy Storage Power Station (Phase I) of State Grid Times successfully transmitted power.

What is the largest grid-forming energy storage station in China?

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide.

What is the largest pumped storage power station in the world?

The station consists of two reservoirs separated by about 1,260 feet (380 m) in elevation. It was the largest pumped-storage power station in the world until 2021, when it was surpassed by the Fengning Pumped Storage Power Station.

What is Ningde Xiapu energy storage power station?

On November 16, Fujian GW-level Ningde Xiapu Energy Storage Power Station (Phase I) of State Grid Times successfully transmitted power. The project is mainly invested by State Grid Integrated Energy and CATL, which is the largest single grid-side standalone station-type electrochemical energy storage power station in China so far.
