

ŁOTWA SYSTEM

Small home solar power generation system in Copenhagen

Overview

How do we use solar energy in Denmark?

Today, we use solar energy in Denmark in two ways: in the form of rooftop solar panels that can produce heat and district heating, and solar cells that can produce electricity. Why is solar energy important?

Can solar energy be harnessed in Denmark?

There is great potential for harnessing solar energy in Denmark. At the same time, the costs associated with producing electricity from solar PV (photovoltaics) have dropped significantly in recent years, and solar PV are now one of the most cost-effective and competitive ways of producing electricity.

Is solar PV expanding in Denmark?

Every quarter, the Danish Energy Agency publishes a solar PV inventory describing the status of the expansion of solar PV in Denmark. The latest version can be found below and shows a total expansion of solar PV in Denmark of more than 3.3 GW as of 1 July 2023.

How many solar heating plants are there in Denmark?

At the end of 2017, there were 296 solar heating plants (solar heating plants with solar panel areas over 500 square metres) in operation worldwide, 111 of which were located in Denmark. Read also: Denmark at global front within solar heating. Solar heating covers approx. 2% of Denmark's district heating production.
