

# Small solar power systems in Slovenia

## Overview

---

How many solar PV systems are installed in Slovenia?

As the leader in most parts of Europe. In 2019, there were 2,496 solar PV systems that were installed in Slovenia generating a total solar capacity of 31.2 MW. Majority of these PV systems were for residential installations. How many solar PV systems.

What is the potential of photovoltaic energy in Slovenia?

Slovenia offers great potential for exploiting photovoltaic energy due to evenly spread solar irradiation. The first photovoltaic power plant in Slovenia was set up in 2001. At the end of 2017, 4,231 photovoltaic power plants had been installed in Slovenia with a total power of 267 MW.

Which energy companies are based in Slovenia?

and renewable energy sources. The most prominent energy companies in Slovenia are ELES, GEN-I, Petrol, and SODO, which are state-owned or privately owned. These companies operate energy.

How many solar panels did Slovenia install in 2025?

Slovenia installed 85 MW of solar in the first half of 2025, driven by growth in commercial and industrial (C&I) projects and utility-scale installations. The lowest total in four years reflects a sharp decline in residential installations, despite continued subsidies for residential hybrid systems.
