

# **Small wind and solar power plant in Ho Chi Minh Vietnam**

## Overview

---

Why is solar power important in Vietnam?

As Vietnam continues its rapid economic development, the demand for sustainable and reliable energy sources has never been more critical. Solar power has emerged as a key component of Vietnam's strategy to diversify its energy portfolio and reduce its carbon footprint.

What percentage of Vietnam's Electricity comes from renewables?

Renewables accounted for 34.7 GWh of generated energy or 12.9% of total power generation. As of the end of 2022, clean energy makes up 26.4% (20.17 GW) of the installed power capacity. Renewables are the third-largest energy source in Vietnam after coal (32.5%) and hydropower (29%).

What is the Ho Chi Minh Rooftop Solar PV Park?

The Ho Chi Minh Rooftop Solar PV Park is a 1,000MW Solar PV power project planned in Soc Trang, Vietnam. Currently in the announced stage, it is expected to be commissioned by 2025.

Are renewables a good option for Vietnam's energy future?

According to our 2019 research on Vietnam's energy future, renewables have the potential to become the lowest-cost option for meeting the country's energy needs. Already, Vietnam has made significant progress on expanding its capacity to generate renewable energy.
