

Solar DC anti-reverse combiner box

Overview

What is a solar combination box?

A Solar Combiner Box is an essential component in solar power systems that combines multiple strings of solar panels into one main output circuit. It provides critical protection functions including overcurrent protection, surge protection, and circuit isolation, ensuring the safety and efficiency of your solar installation.

Should solar combiner boxes have surge protection?

Photovoltaic (PV) Solar Combiner Boxes should have surge protection features to avoid impacts from thunderstorms on entire solar energy systems. In on-grid systems, solar combiner boxes should have reverse flow protection features preventing current flowing back into grid causing harm.

What is a 1500V DC combiner box?

EOTEK Solar's 1500V DC combiner box is a high-quality solution designed for utility-scale solar power plants. Equipped with a 1500V DC disconnect or molded case circuit breaker, PV fuses and Type 2 PV surge protector, it provides comprehensive overcurrent and overvoltage protection to ensure efficiency and reliability in high-power applications.

How to choose a solar combiner box?

In on-grid systems, solar combiner boxes should have reverse flow protection features preventing current flowing back into grid causing harm. To protect system from overload or short-circuit damage, choose solar combiner box with these functions.
