Solar container battery warranty standards

Overview

If your packaging contains lithium batteries, these regulations guarantee they're safe to transport and install. UN38.3 is essential for global shipping; IEC 62619 guarantees cell-level security. What is a solar battery warranty?

Solar battery warranties vary by manufacturer and product. A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery.

How long does a battery warranty last?

A standard battery warranty should come with at least 10 years of protection, though it can be shorter depending on how often you charge and drain your battery. Battery warranties typically won't reimburse for labor costs associated with installing new equipment or shipping fees for new equipment.

Do solar panels come with a warranty?

- Solar panels: Typically come with a 10-15 year product warranty, and a 25-30 year performance warranty guaranteeing a certain level of power output.
- Inverters: Usually covered for 5 to 10 years, depending on the brand. Some offer optional warranty extensions.

Do Australian batteries have a 10-year warranty?

Australian warranties look simple—“10-year warranty” splashed across brochures—but the real coverage rests on four intertwined promises. Understanding those promises and how they interact with your own energy habits and ACL protections ensures you pick a battery that will serve your household for the long haul.
