

# **Solar glass continues to expand production**

## Overview

---

How will the Solar Photovoltaic Glass market continue to grow?

Competitive strategies range from Chinese producers expanding commodity capacity to Western incumbents investing in circularity, low-carbon furnaces, and specialty coatings. These shifts together position the solar photovoltaic glass market for resilient growth throughout the decade.

How does solar gain affect a glazing system?

In the case of solar gain, it can be subject to thermal stress breakage, which is caused by an uneven distribution of heat across the surface of a pane of glass. As a glazing system is exposed to sunlight it absorbs the heat which causes the glass to expand within the frame.

Why is NSG launching a new solar glass production line?

January 2025: NSG Group has commenced operations of a new solar glass production line in the United States, strengthening its position in the solar photovoltaic glass market. This development is expected to enhance the supply of high-quality solar glass, supporting the growing demand in the renewable energy sector.

How big is the Solar Photovoltaic Glass market?
