# Solar inverter production in Libya

## Overview

---

Are solar PV systems a good investment in Libya?

In Libya, the solar photovoltaic (PV) systems are encouraging for the future, due to incident solar radiation is greater than the minimum required rate across the country (Hewedy et al., 2017). Based on that from a techno-economics point-view, there is a need to develop substantial energy resource solutions.

Can Libya develop solar photovoltaics?

Libya has a great opportunity to build large-scale solar photovoltaic power. For the scholars, it's considered as an entrant, which can help to develops and adopt this technology. This paper will be valuable as it is a one-step approach for the development of solar photovoltaics application in Libya.

Could Libya be a solar energy exporter?

The desert technology (DESRT-TEC) is one of the largest projects; there was proposed that Libya would be one of the exporters of solar power generated from solar energy to Europe (Griffiths, 2013). The aims of that project to provide Europe Union countries with energy generated from the sun in North Africa and the Middle East countries.

How much solar power does Libya have?

In-depth south regions of Libya, the daily average solar PV power potential is greater than 6.5 kWh/kWp, although the annual average is greater than "2045 kWh/kWp". Fig. 5. Solar photovoltaic power potential in Libya (GSA, 2020).
