What is a monocrystalline solar panel?

A monocrystalline panel is a flat black single solar panel. You can easily identify them by their corner-cut, square-shaped silicon wafers. As the name suggests, these solar panels are built with a single silicon crystal. This crystal is brought into this shape via several steps.

How much do monocrystalline solar panels cost?

The most notable thing about monocrystalline panel pricing is the high cost premium commanded by the best mono manufacturers, SunPower and Panasonic. At the wholesale levels, these solar panels cost in the 75 cent to \$1 per watt range.

Are monocrystalline solar panels better than other solar panels?

Their efficiency usually ranges between 17% and 22%. Higher efficiency indicates that monocrystalline solar panels would take less space than other solar panels to produce the same energy. Hence, monocrystalline panels should be your first choice if you are looking for residential solar panels.
