How to measure solar panel voltage?

The solar panel voltage is sensed by a voltage divider network consists of two resistors  $R1=47k$  and  $R2=6.8k$ . The output from the  $R1$  and  $R2$  is connected to ESP32 analog pin GPIO pin 34. The output from the voltage divider is smoothed out by using a ceramic capacitor  $C1$ . Voltage Measurement :.

What is a PV meter?

A PV meter, or photovoltaic meter, is a device used to measure the performance of solar panels. It provides data on solar irradiance, voltage, and current, helping to ensure that the solar power system operates efficiently.
