

# **Solar power satellite factory in Portugal**

## Overview

---

What is the largest solar power plant in Portugal?

With an installed capacity of 181 MW, the Santas solar power plant is one of the largest in Portugal. Located in the municipalities of Monforte, Borba, and Estremoz, it provides clean, renewable electricity to more than 100,000 households.

Are there solar farms in Portugal?

As it stands, there are a number of large and medium-scale solar “farms” in operation globally. Portugal has a particularly ambitious plane to overhaul its energy production, and is already home to a number of exciting projects to support this.

Does Portugal have a solar energy sector?

Portugal's solar energy sector is experiencing rapid growth as a result of government policies that prioritise the development of renewable energy. Solar power is essential in the pursuit of the nation's ambitious goal of generating 80% of its electricity from renewable sources by 2030.

Is Portugal a good place to invest in solar energy?

Portugal's regulatory framework is supportive of renewable energy, and it includes subsidies for solar installations and investments in grid integration. The country's moderate climate and high solar potential render it an ideal location for solar energy development, offering a plethora of opportunities for investors and developers.
