# **Solar power station in China in Calcutta**

## Overview

---

Which province has the largest solar power plant in China?

As of data from April 2023, the largest PV solar plant in the country is the Gonghe Photovoltaic Project, located in the province of Qinghai, with a capacity of over 3,000 megawatts. Zhejiang, followed by Qinghai, were the provinces accounting for the largest capacity of operational solar power farms in 2022.

What percentage of solar PV power plants are in China?

Of the total global solar PV capacity, 40.73% is in China. Listed below are the five largest active solar PV power plants by capacity in China, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to provide a complete picture of the global solar PV power segment.

Where is China's 3rd largest solar power plant located?

Located in Datong City, Shanxi Province, it is the country's 3rd largest solar power plant. China's National Energy Administration aimed to install solar plants in this area. After successful completion of the project's 1st phase in 2016, this solar plant now has a total capacity of 1.1 gigawatts.

How many solar farms are there in China?

China generates solar-powered energy from 1,316 solar power plants across the country. In total, these solar power plants has a capacity of 54551.8 MW. How much electricity is generated from solar farms each year?
