

Solar powered portable outlet in Chile

Overview

What plug types and power outlets are used in Chile?

The Standard Plug Types and Power Outlets used in Chile are: Adapter vs. Converter An Adapter (aka plug adapter or power adapter) is used to adapt the physical shape of the plug so that it can be plugged into a different type of power outlet or socket. It doesn't transform the voltage of the power source.

Does Chile have a power outlet?

No, most power outlets and plug types in Argentina are type-I (the same as in Australia, New Zealand, and China). However, there are some places in Argentina with type-C power outlets — the plug type used in Chile — or outlets that accommodate both. Do I need a voltage converter in Chile?

Chile has a 220-240 voltage supply.

Do you need a power adapter in Chile?

While much of Latin America uses the same power outlets as the USA, Chile does not, so travelers coming from North America will need to pack a power adapter. There are two types of plugs used in Chile, type C and type L. The type C plug is known as the “Euro Plug” since it’s the same plug used in most of Europe.

What voltage do I need for a power outlet in Chile?

The standard voltage is 220V, with a frequency of 50Hz. Most modern electronic devices support dual voltage (110-240V), but if your device only supports 110V, you will need a voltage converter. 2. A plug adapter: The power outlets in Chile generally have two round pins, similar to European plugs.
