# South Africa Solar Container Two-Way Charging

## Overview

---

Will South Africa have a solar-powered EV charging station in 2024?

In November 2024, South Africa launched its first off-grid, solar-powered EV charging station in Wolmaransstad. Here's what you need to know: CO2 Savings: Each station reduces 54 tons of CO2 monthly (equivalent to planting 1,200 trees annually). Fast Charging: 18 minutes for a 300km range using 480kW DC chargers.

How does solar EV charging work in South Africa?

The system's smart software ensures efficient power distribution, prioritizing renewable energy sources across all charging points. South Africa's solar EV charging network has been strategically placed along major highways to provide dependable access for travelers.

Who is zero carbon charge?

Zero Carbon Charge (CHARGE), South Africa's first company to pioneer a national network of off-grid, solar-powered ultra-fast electric vehicle (EV) charging stations, is proud to announce a R100 million equity investment from the Development Bank of Southern Africa (DBSA).

Where is the first solar EV charging station in South Africa?

The first solar EV charging station is situated at the N12's Leeudoringstad turnoff, between Klerksdorp and Wolmaransstad in North West Province . This location was chosen for its excellent solar exposure, utilizing 480 bifacial panels, and serves drivers traveling between Johannesburg and Cape Town .
