South Africa's large-scale production factory energy storage cabinet

Overview

What is the largest battery energy storage system in Africa?

Unveiled in 2023, thanks to \$195 million from the International Bank for Reconstruction and Development (IBRD) and \$220 million from AfDB, this flagship project represents the largest battery energy storage system (BESS) on the African continent.

Why is battery storage important in South Africa?

In South Africa, battery storage is increasingly seen as a key pillar to help provide grid stability and integrate variable renewables given its ageing coal-fired power fleet and grid.

Does South Africa have a battery storage tender programme?

South Africa is aiming to procure utility-scale battery storage with two tender programmes: its Battery Storage IPP Procurement Programme as well as hybrid battery storage and variable renewables projects through its Risk Mitigation IPP Procurement Programme.

Does Eskom have a battery energy storage system?

Eskom is now searching for solutions for demand management and it has started procuring battery energy-storage systems (BESS). It has awarded contracts to two suppliers (a South Korean company called Hyosung Heavy Industries and a Chinese company named Pinggao Group).
