

Southern Europe Vanadium Battery Energy Storage Company

Overview

What is the largest energy storage plant based on vanadium flow batteries?

The battery installation, which received funding from the SOLBAL photovoltaic investment aid programme, managed by IDAE, has a power of 1.1 MW and a storage capacity of 5.5 MWh, making it the largest energy storage plant based on vanadium flow batteries in Europe.

What is the largest vanadium redox flow battery in Europe?

Image: Enel Green Power via X What is thought to be the largest vanadium redox flow battery (VRFB) at a solar farm in Europe has been switched on by Enel Green Power in Mallorca, Spain. The 1.1MW/5.5MWh flow battery has been installed at Enel Green Power Espana's 3.34MWp Son Orlandis solar PV plant in the Mallorcan municipality of Palma.

What is a vanadium flow battery system?

Vanadium flow battery systems are ideally suited to stabilize isolated microgrids, integrating solar and wind power in a safe, reliable, low-maintenance, and environmentally friendly manner. VRB Energy grid-scale energy storage systems allow for flexible, long-duration energy storage with proven high performance.

What are vanadium redox flow batteries (VRFBs)?

Vanadium Redox Flow Batteries (VRFBs) are the simplest and most developed flow batteries in commercial operation, and are well-positioned to take a significant share of the stationary energy storage market.
