# The energy storage container is 5MWh liquid cooling

## Overview

---

What is a 5MWh liquid-cooling energy storage system?

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20'GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more. And, the container offers a protective capability and serves as a transportable workspace for equipment operation.

What is Mercury Max 5MWh liquid cooled container?

Mercury MAX 5MWh liquid-cooled container adopts the 1P104S large PACK solution, which increases the energy density by about 20%, effectively optimizing the production process and saving costs; the compact design and reasonable matching of the power of the hydrothermal system can further improve the energy density of the energy storage system.

What is a 5MWh battery energy storage system?

As well as reducing energy consumption; the single 5MWh battery energy storage system makes it easier to select the energy storage converter (PCS) and configure the power station.

What is the difference between Zenergy energy storage container and 5MWh?

Zenergy energy storage container is equipped with self-produced 314Ah batteries, and the 5MWh energy storage container is equipped with self-produced 314Ah batteries. Through modular design, it can be flexibly arranged and expanded, and the system is more standardized.
