

# **Türkiye mobile power storage vehicle customization**

## Overview

---

Where is Turkey's first solar power plant located?

In 2018, Turkey's first large-scale battery plant was established in Manisa, integrated with a wind power station. During the following year, Turkey's first grid-connected solar energy and storage facility came into operation in Konya, showcasing simultaneous solar energy generation and battery storage.

Are storage activities legal in Turkey?

The first legal provision on storage activities in Turkish law was introduced with the subparagraph (e) added to Article 14 of the Electricity Market Law No 6,446 (EML) with the amendment dated 21 March 2018. With the relevant amendment, storage activities have been regulated as an activity which can generally be conducted without a licence.

Will Turkey achieve its smart grid ambitions by 2035?

Aligned with the Turkey Smart Grids 2023 Vision and Strategy Determination Project, developed by the Electricity Distribution Services Association in collaboration with the Energy Market Regulatory Authority, Turkey aims to realise its smart grid ambitions by 2035.

How are electricity storage facilities established?

Electricity storage facilities can be established in different ways depending on the licence types of legal entities operating in the electricity market. Storage facilities with a maximum installed capacity of 1 MW can also be established by technology development zones and industrial zones for use in their R&D activities.
