# UK home solar power generation system

## Overview

---

How many homes in the UK use solar panels?

Over 1.4 million homes in the UK already use solar panels, and more people are choosing them every year. What are solar panels?

Solar panels are roof-mounted systems that capture the sun's energy, converting it into electricity for your home. Save on average over £500 per year.

How much do solar panels cost in the UK?

The average cost of a 4kWp solar panel system in the UK ranges between £5,000 and £8,000. This cost includes the price of the panels, installation fees, and any additional equipment needed for a robust setup, such as inverters and mounting systems. Can a homeowner in the UK legally install solar panels without professional assistance?

How do solar panels work in the UK?

In the UK, panels are typically south-facing for maximum exposure. Solar energy is classified as renewable and reduces dependence on finite resources like coal and natural gas. The efficiency of solar panels, affected by factors like positioning and shading, determines the amount of energy produced.

How efficient are solar panels in the UK?

In fact, a bit of rainwater can help clear dust and keep them clean. Most domestic solar panels in the UK are around 15-26% efficient, with most solar panel manufacturers in the UK providing efficient monocrystalline options. As a benchmark, experts recommend installing panels with efficiency rates exceeding 22%.
