

# **UPS uninterruptible power supply equipment installation height**

## Overview

---

What is an uninterruptible power system (UPS)?

Uninterruptible power system (UPS) (1) An electrical system designed to provide instant, transient- free backup power during power failure or fault. Some UPSs also filter and/or regulate utility power (line conditioning). (2) A Device whose sole purpose is to save your equipment, your data and your job. User replaceable.

What is an uninterruptible power supply?

An uninterruptible power supply provides power protection in the form of back-up power when the mains power supply fails and protection from power problems when the mains power supply is present.

What is a method statement for uninterruptible power supply?

This Method Statement applies to all installations of Uninterruptible Power Supply at Project electrical works. Manpower and equipment shall be organized to meet the schedule as per the approved construction program. 3. Definition 3.1. Abbreviation UPS - Uninterruptible Power Supply QAQC - Quality Assurance Quality Control MS - Method Statement.

How to install ups?

Installation Procedure UPS systems are to be installed as per the approved drawings, as per the new approved single-line diagram for UPS attached in the material submittal. The installation will begin by placing the UPS units in the pre-determined location. The input and output cables for each UPS will be connected.
