

# **US Energy Storage Power Supply Purchase EK**

## Overview

---

Will US energy storage industry invest \$100 billion in batteries?

Courtesy of Salt River Project The U.S. energy storage industry will invest \$100 billion over the next five years to build and buy batteries made in the United States, the American Clean Power Association and company representatives said Tuesday.

Will US-made batteries meet 100 per cent of energy storage demand?

On Tuesday, American Clean Power, the clean energy industry trade group, announced a \$100bn commitment on behalf of the energy storage industry to manufacture and buy US-made batteries with the aim of meeting 100 per cent of domestic energy storage demand by 2030.

What is the US energy storage monitor?

A few tips before you get started. The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry data is compiled into this report to provide the most comprehensive, timely analysis of energy storage in the US.

How much energy is stored in the United States?

According to Wood Mackenzie, there is 83 GWh of installed energy storage capacity in the United States, including nearly 500,000 distributed storage installations. Current forecasts show that U.S. storage capacity is expected to reach 450 GWh by 2030, falling short of the capacity required to support our nation's energy needs.
