

Uninterruptible Power Supply Berlin

Overview

Why do we need an uninterruptible power supply (UPS) system?

In data centres, traffic control centres, on sensitive production lines and in many other fields, systems for the uninterruptible power supply (UPS systems) save lives and secure data, avoid costs, ensure order, protect infrastructures, and prevent situations arising that can threaten livelihoods.

Who makes UPS - uninterruptible power supplies?

We stock a large selection of UPS - Uninterruptible Power Supplies, including new and most popular products from the world's top manufacturers including: Apc, Schneider Electric, Siemens, Phoenix Contact & Ea Elektro-automatik BR1500GI. Hazardous Item: There maybe additional transit time on this item.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and revenue.

What makes Puls a reliable power supply?

Efficient, compact and reliable DC-UPS from PULS ensure highest system availability. Our uninterruptible power supplies are available with capacitor storage or VRLA batteries. The DC-UPS with integrated electrochemical double layer capacitors are fully maintenance free and guarantee an uninterrupted power supply for periods measured in seconds.
