Uninterruptible power supply for the Pretoria plant

Overview

What is an uninterruptible power supply?

An uninterruptible power supply, also uninterruptible power source, UPS or battery/flywheel backup, is an electrical apparatus that provides emergency power to a load when the input power source, typically mains power, fails.

*Note: A UPS will beep continuously when power is off. This is normal. The UPS is only a temporary power source.

What is a 220V / 230V power supply?

UPS 220V / 230V uninterrupted power supplies. Sales South Africa; Computer hardware. An uninterruptible power supply, also uninterruptible power source, UPS or battery/flywheel backup, is an electrical apparatus that provides emergency power to a load when the input power source, typically mains power, fails.

Why do you need a power plant ups?

Power plant UPS are also used to provide an extra layer of protection for security alarms and communications in utilities and their respective network of remote substations. Uninterruptible power supplies can offer protection to your equipment and essential service throughout your infrastructure.

Why should you install a power plant ups in an 811 call center?

Power plant UPS keep operations up while a UPS installed in an 811 call center can help keep lines open so utility lines aren't damaged by misinformed digging. Whatever point in your power distribution needs support, Mitsubishi Electric can help.
