

Uzbekistan solar monitoring solar panels

Overview

In the first week of December 2025, Uzbekistan unveiled a sweeping package of renewable energy and grid projects, deepened partnerships with Saudi and other foreign investors, and disclosed new figures showing that small-scale solar panels alone have already generated nearly 2 billion kWh of electricity this year. What is solar energy policy in Uzbekistan?

This Solar Energy Policy in Uzbekistan Roadmap is part of the EU4Energy programme, a five-year initiative funded by the European Union. EU4Energy's aim is to support the development of evidence-based energy policy design and data capabilities in Eastern Partnership and Central Asian countries, of which Uzbekistan is a part.

What is Uzbekistan's solar energy vision?

It outlines the sustainable energy environment solar energy could deliver and offers a timeline up to 2030. In this vision, Uzbekistan succeeds in maximising the benefits of solar energy capacity for both electricity and heat, making solar energy one of the country's major energy sources.

Does Uzbekistan need a solar energy roadmap?

The government of Uzbekistan needs to periodically monitor its progress toward a solar energy future and to review policies and actions where appropriate. This roadmap provides a timeline through 2030 with key actions.

How to make solar energy a key energy source in Uzbekistan?

The policy and regulatory frameworks enabling further solar energy deployment in Uzbekistan. Increasing power system flexibility to integrate the increasing amount of solar generation. Finally, the recommended actions are a co-ordinated package of measures to implement to make solar energy the key energy source in Uzbekistan in 2030 and beyond.
