

Overview

How much solar power does Phnom Penh need?

Phnom Penh needs some 400 megawatts. We will increase the energy generation capacity by coal-fired power plants," the Premier was quoted in news reports. Solar power capacity has been on a sharp ascent in Cambodia recently, increasing at a 10% annual rate from less than 1% of national generation capacity, however.

Is solar energy a good source of energy in Cambodia?

Solar energy in Cambodia is the country's second most promising clean energy source behind hydropower. Hydropower remains Cambodia's most developed renewable energy source but also has its own challenges – such as yearly variability due to droughts and floods.

What is the current state of solar energy in Cambodia?

The Current State of Solar Energy in Cambodia Cambodia's solar energy sector has grown significantly in recent years. As of 2022, the country had installed around 432 MW of solar capacity, with a goal of reaching 1,000 MW by 2030.

How much does solar energy cost in Cambodia?

One of the promising traits of solar energy in Cambodia is its cost. The average electricity price for solar power is around USD 0.03 per kW, significantly lower than that of coal, which is USD 7.7 per kW.

Wattage of solar cells in Phnom Penh

Solar PV Analysis of Phnom Penh, Cambodia
