## Overview

---

How can glass for Europe help re-build a European solar industry?

Glass for Europe represents almost 90 percent of flat glass production in the EU and its members can play a key role in re-building a European solar industry in the EU. The main goal of the European Solar PV Industry Alliance is to mobilise finance for European solar PV projects to increase the manufacturing capacity.

Is glass for Europe a member of the European solar PV industry alliance?

website maker Glass for Europe is officially a member of the European Solar PV Industry Alliance, an initiative launched in December 2022 by the European Commission. The Alliance gathers key players in the value chain of the solar energy industry and aims at scaling up the production of solar PV panels and value chain components in Europe.

What is solar glass & windows?

Solar glass and windows represent a groundbreaking advancement in building-integrated photovoltaics, offering a seamless blend of functionality and energy generation. These innovative solutions incorporate ultra-thin solar cells between glass layers, allowing natural light to pass through while capturing solar energy.

What is BIPV glazing?

BIPV glazing is a laminated safety glass that incorporates photovoltaic cells. As this energy-generating glass is an integrated part of the façade, it is not necessary to install separate traditional photovoltaic units on the rooftop.
