

# **What is the maximum inverter power of a motorhome**

## Overview

---

Do you need an inverter for a camper?

Most people who use campsites regularly probably don't need to bother about fitting an inverter in their motorhome or camper. After all, the idea of it is to change 12v power from the leisure battery into 230v power which can be used to power appliances like laptops and hairdryers.

What size inverter do I need for my RV?

So it makes sense that it has different inverter power needs. Some RVs only need small inverters, while a larger RV with a huge TV and fireplace would need a larger inverter. The size of the inverter you need for your RV depends on the power requirements of the electrical devices you want to use and the length of time you want to use them.

Does a motorhome have an inverter?

Thankfully your recreational vehicle has an inverter onboard which can draw power from your motorhome's 12 volt (V) battery storage — reviving your phone. In this blog, we discuss what an inverter is, different types of inverters and how to match one to your motorhoming needs.

How much power does an inverter use?

Some inverters use more power than others — and there are examples of models that draw 5000W of battery power but deliver 4000W of maximum output. Check this difference between battery input and inverter output with the seller before you decide to buy.
