

# **What kind of glass is solar sun room**

## Overview

---

Solar control glass is engineered to filter and reduce solar heat gain while maintaining natural daylight, making it ideal for sunrooms that require energy efficiency and comfort. What is a glass sunroom?

A glass sunroom is your outdoor space which is completely covered with glass to keep you safe around and nothing can disturb you and let you enjoy all seasons the whole year-round. If you're confused about selecting the right sunroom for your home, let's get straight into it! Know The Types of Sunrooms First!.

What type of glass is used to build a sunroom?

This will give you a better idea of what type of glass is being used to build your room. A truly insulated sunroom is built using double-pane glass - never single pane glass. Between the layers of glass is usually an inert gas such as Argon, which provides a barrier to insulate the room from outside temperatures.

Why do you need a glass sunroom?

When the idea of having an outdoor dinner sounds crazy because of brutal weather outside. A glass sunroom is your outdoor space which is completely covered with glass to keep you safe around and nothing can disturb you and let you enjoy all seasons the whole year-round.

How much does a glass sunroom cost?

For a three-season sunroom, the materials may cost you around \$6,000-\$35,000, and if you wish to install a four-season glass sunroom, you may have to spend above \$15,000 on materials only. Better End! A glass sunroom may seem expensive, but it enhances the exterior decor aesthetics and increases the security from pests and other allergies.
